**Special
Symbols**

Here you can find the last information for all stages

Special map symbols

In general, the IOF symbols are used. Due to the different situations, we made small adjustments.

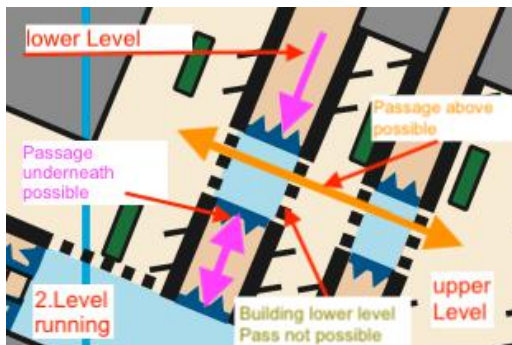

Schlossberg:

Because of the steep slope we use 0,18 contourlines instead of 0,21 to make the map better readable.

Two-level:

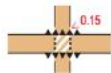

At areas where runners can run on two different levels, we do not use the IOF symbol (512.3 – brown and white stripes). For the better readability we decided to use light blue surface on all stages. Especially on very small passes, the IOF-symbol would be difficult to see. Our opinion is, that the blue colour is better readable.

> Especially at Stage 1, runners will run on a complex building. To make it more clear we use different colours for each level: first floor = lower level = IOF (501 brown). Second floor = upper level = light brown.

Bridge or tunnel-entrance

Instead of IOF-Symbol (512.1) we use dark blue Symbol

we use dark blue Symbol

instead of black ones. So it is a better contrast to black walls.

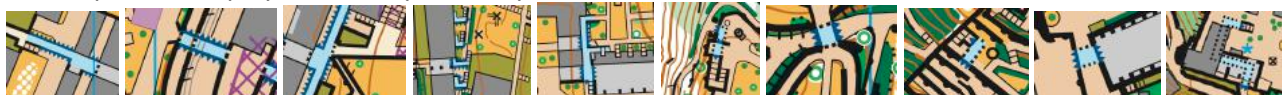

Staircase:

At Stage 1, staircases at the medical campus climb two floors. For better visibility where you can entry, we use red arrows. Double arrow show the entrance at the lower level. A single arrow shows the entrance at the upper level.

Two-level situations:

In the spirit of fair play, we show you nearly all critical situations here.

Vegetation:

We use four different sizes for trees.

Very large tree (IOF), Large tree (little smaller), Small tree (IOF), very small tree (recently planted).

Small bushes/thickets are mapped with green dots.

It is forbidden to cross or slip trough Hedges (green/black), even if this would be possible in the terrain!!!
If there is a passage, you can run trough.
